

GREYSTONE

Get on with life!

Your perfect partner in manure collection.

MAXIVAC

800 LTR or 5-6 Barrows

The "Australian Made" Greystone Paddock Vac range is now proudly exported world wide, with agents in the US and Europe. We are also very proud to have world famous dressage champion, Steffen Peters as our ambassador. Steffen uses a Greystone Maxi Vac & Arena Rake Pro 2100mm. Our Maxi Vac 800 ltr model was designed for larger properties to reduce the time spent emptying; it also has a larger frame, wheels and tyres to carry the extra load. Your pasture will thrive using a Maxi or Paddock Vac. Regularly vacuuming manure helps to eliminate bare spots and weed infestation, not to mention the reduction in worm count and fly infestation. Powered by the reliable Honda 4 stroke 50cc new generation motor with 2 year domestic warranty. Greystone's powerful vacuum removes manure in wet or dry conditions, long or short grass, leaving little or no residual unlike manually picking up manure.

Simply attach your Greystone Paddock or Maxi Vac to your ride on mower or quad bike and vacuum manure and it's harmful parasites in seconds! You will save time allowing you more time to ride, rather than countless hours cleaning.

STEFFEN PETERS

"WE LOVE THE SIMPLICITY OF IT AND IT IS SO EASY TO USE!"

- Storage Capacity 800 Ltr
- Length 1700mm
- Height 1170mm
- Width 1060mm
