

## Arena Rakes :

Level & aerate your arena.

Greystone Arena Rake Pro 2100  
with yellow Pro-Blade

Greystone's now world famous range of Arena Rakes make light work of arena maintenance. No heavy lifting, simply attach to your quad bike, car or tractor and drive into the arena, set to your preferred height and start levelling and aerating at the same time. Our unique flip down side grader eliminates edge build up, by dragging the topping back to the track without the need for hand shovelling. When you have finished simply wind up and drive out of the arena. Used by champion dressage riders Steffen Peters & Heath Ryan who love the simplicity of using Greystone Arena Rakes.

Arena Rake 1500
